

EXPANDING CAPABILITIES

What Clients Say about Implementing

"We have been able to accomplish this [higher sales with much lower inventories] only because TOC helped us manage our business priorities and define the appropriate sizes of the inventory stock buffers across the supply chain. I am confident we now know what to produce to meet customer demand, which is inherently different than the sales forecast"

Helmut Hock, President, Royal Pipe Systems – a Georgia Gulf Company

REGISTRATION details:

Price -

One Day - € 595 / person / day
Both Days - € 495 / person / day
Group (3+) discount - € 50 / person / day

Price Includes -

8:00am to 5:00pm session
Light breakfast, lunch and snacks
E-copy of presentation materials

Payment Methods-

Visa, Mastercard, Wire Transfer

Email: joss@cm-sys.com
Phone: +31 646 241 243

Deadline -

One week prior to session
Don't delay as spaces usually fill up fast

What Attendees Say about the Workshop

"I have been to a number of seminars that go in one ear and out the other. This workshop will change the way I think and work – TOMORROW MORNING"

Steve Parkhill, VP Operations, Maple Leaf Foods

Reduce Inventory and Improve On-Time Availability

In order to ...

Reduce Inventory and Improve On-Time Availability

You must ...

Throw away your Forecast and your Efficiency Measures

Then you will ...

Reduce costs, Increase sales and Improve Cash Flow

To understand why and how, please join us at one of the following events:

City	Focus on Production Planning & Execution	Focus on Inventory Management & Replenishment	Location
Amsterdam	June 5	June 6	The Grand Krasnapolsky Hotel Amsterdam, The Netherlands

Attend Constraints Management Systems' (CMS) two day "hands-on" manufacturing and distribution workshops and learn how to significantly reduce inventory while improving on-time availability supported by CMS RoadRunner Manufacturing and Inventory Replenishment Software.

Day 1 - Focus on Production Planning & Execution offers manufacturers the opportunity to experience implementing the Theory of Constraints (TOC) and Lean Manufacturing. This day highlights how to: uncover hidden capacity, improve due date performance and reduce inventory, by removing traditional plant efficiency measures and replacing them with a new scorecard.

Day 2 - Focus on Inventory Management & Replenishment offers manufacturers and distributors the opportunity to experience the TOC and Lean approach to Consumption-Driven Continuous Replenishment. This day highlights how to: reduce inventory and improve product availability in the plant and at the warehouses, by no longer relying on the forecast.

Participants are highly encouraged to attend Day 1 to get the most out of Day 2.

Constraints Management Systems rapidly increases profit for manufactures and distributors by using the Theory of Constraints.
