

EXPANDING CAPABILITIES

What Attendees Say about the Workshop

"By experiencing the benefits of TOC during the first day of the workshop, you are convinced it works even before the theory is explained"

Ella de Vette, CFO, Dixons

"The CMS Throughput Improvement Simulation visualizes the theory in a pragmatic way, resulting in easier feedback with ongoing processes. A very useful experience!"

Wilbert van Putten, Production Manager, Medisize

"The Simulation is very appealing and really makes you think and act in the TOC-way"

Herman de Gelder, Directeur Finance & Operations, Isolectra

REGISTRATION details Workshop:

Price -

One Day - € 595 / person / day
Both Days - € 495 / person / day
Group (3+) discount - € 50 /person /day

What Clients Say about Implementing

"We had heard about the Theory of Constraints and with great enthusiasm started to implement and the results showed in just a few months. We were lucky to implement CMS RoadRunner software that runs on TOC philosophy and supports the whole concept."

Agnesa Stemberger, CFO, Tomplast

Reduce Inventory and Improve On-Time Availability

In order to ...

Reduce Inventory and Improve On-Time Availability

You must ...

Throw away your Forecast and your Efficiency Measures

Then you will ...

Reduce costs, Increase sales and Improve Cash Flow

To understand why and how, please join us at the following event:

City	Focus on Production Planning & Execution	Focus on Inventory Management & Replenishment	Location
Amsterdam	November 17	November 18	CMS Office Anderlechtlaan 175 1066 HM Amsterdam

Attend Constraints Management Systems' (CMS) two day "hands-on" manufacturing and distribution workshops and learn how to significantly reduce inventory while improving on-time availability supported by CMS RoadRunner Manufacturing and Inventory Replenishment Software.

Day 1 - Focus on Production Planning & Execution offers manufacturers the opportunity to experience implementing the Theory of Constraints (TOC) and Lean Manufacturing. This day highlights how to: uncover hidden capacity, improve due date performance and reduce inventory, by removing traditional plant efficiency measures and replacing them with a new scorecard.

Day 2 - Focus on Inventory Management & Replenishment offers manufacturers and distributors the opportunity to experience the TOC and approach to Consumption-Driven Continuous Replenishment. This day highlights how to: reduce inventory and improve product availability in the plant and at the warehouses, by no longer relying on the forecast.

Participants are highly encouraged to attend Day 1 to get the most out of Day 2.

Constraints Management Systems Inc. is a management and technology consulting firm with offices in North America, Europe and the Middle East.
